Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments, see appeal brief, filed 4/18/07, with respect to claims 2-7 and 9 have been fully considered and are persuasive. The rejection of claims 5-7 has been withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tucker et al 4,974,753.

Tucker et al show a collar comprising a keyplate 64 and a first 30 and second 40 flange. Tucker et al discloses the claimed invention except for the notch 68 on the flange 30 and the projecting part 32 on the dispenser. It would have been obvious to one having ordinary skill in the art at the time the invention was made to put the notch on the flange and the projecting part on the dispenser, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art.

Re claim 9 discloses the claimed invention except for each flange including a notch. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a notch on the second flange, since it has been held that

mere duplication of the essential working parts of a device involves only routine skill in the art.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tucker 4,974,753 in view of Smernoff 5,377,876.

Tucker et al lack the collar having a vertical rib. Smernoff shows a vertical rib 16 on a collar to facilitate grasping (column 4, lines 33-34). It would have been obvious to one of ordinary skill in the art to have modified the Tucker et al collar with a vertical rib as taught by Smernoff to facilitate grasping.

Allowable Subject Matter

Claims 5-7 are allowed.

Response to Arguments

Applicant's arguments filed 4/18/07 have been fully considered but they are not persuasive. Applicant contends that the flanges of Tucker et al do not receive a keyplate therebetween. Tucker et al show first 30 and second flanges 40 receiving a keyplate 64 in as much as applicant claimed invention.
